FACT SHEET:

CTAA's Capital Solutions for Medical Transportation Providers

If you're a current member of the Community Transportation Association of America (CTAA) providing medical transportation services and want to improve your edge and bottom line in this growing field, we can help. CTAA's Capital Solutions is a leader in providing resources you need for success. Whether you have a hundred vehicles or just one, we have a place for you.

CTAA's Capital Solutions offers:

- The best vehicle fleet program of its kind linked to high-performance Toyota products – like the Prius and Sienna – well as access to a family of accessible vehicles for passengers with special needs ranging from wheelchairs to stretcher carrier vehicles. Our fleet program includes ToyotaCare to help lower your operating costs for all of our vehicles
- Access to short- and long-term vehicle financing that rewards those with good credit history, as well as helping those who are just starting out or need a second chance
- A full range support services like our national insurance exchange and our fleet fueling programs
- Discounted, accredited training and educational programs that help you achieve the highest standards of quality services and provide ways to make your service the safest.

Our team of medical transportation business advisors are available to help design a better approach to your business – big or small – ways to improve your standing with intermediaries, transportation brokers, insurance companies, the health care community and, especially, you're passengers.

We work closely with you to leverage our network of thousands of providers who share valuable insights and experiences, both at our annual conference and other networking opportunities.
