</table>
Project Obstacles

PEAC advocates have found they are not included in inclusive planning until after a barrier has been identified.

Advocates are working to become apart of the planning processes as well as the implementation phases in transit.

- We were involved in the planning of bike share coming to Detroit.
- Testing of autonomous vehicles before they hit the market.
- Training new bus drivers in the SMART bus system.
Project Lessons

Sharing stories is one of our strongest skills - Our advocates have strong voices and can advocate for their independence.

Continuous follow-up is the key to true resolutions and change.

Building partnerships and allies with other groups to advocate creates a stronger voice.
Our work isn’t done!!

Continuously identifying and recruiting new leaders in the community
  ● Developed a transportation advocacy group with students in Wyandotte schools

Our advocates are travel training with legislators

Meeting with local representatives and senators

Discussing and documenting travel concerns
  ● Issues with mobility management groups in area
